PROFESSIONAL SUMMARY

Cybersecurity graduate seeking an entry-level, internship, or cooperative-training role in SOC, GRC, IAM, or cyber risk. Hands-on with SIEM monitoring, log analysis, threat detection, incident analysis, vulnerability assessment, and compliance with NCA ECC, ISO 27001, and NIST. Certified in CompTIA Security+, CEH, eJPT, eCPPT, and eCIR (CompTIA CySA+ scheduled).

TECHNICAL SKILLS

Security Operations: SIEM, log analysis, event correlation, threat detection, alert triage, incident response.

GRC & Compliance: NCA ECC, SAMA CSF, ISO 27001, NIST, policy review, risk assessment, security awareness.

IAM & Access Control: IAM, account provisioning/de-provisioning, MFA/2FA, FortiToken, least-privilege, PAM Concepts.

Vulnerability & Testing: vulnerability assessment and reporting, Nmap, Burp Suite, Metasploit, Kali Linux.

Network & Cloud Security: network security, IDS/IPS, endpoint, cloud and OT/IoT security fundamentals.

Tools: ELK Stack (Elasticsearch, Logstash, Kibana), Snort, Cowrie, Windows, Linux, MS Office.

Documentation: technical documentation, security report writing, user guides.

Soft Skills: analytical thinking, problem-solving, teamwork, attention to detail.

TRAINING EXPERIENCE

National Center for Meteorology (NCM) | Cybersecurity Intern (Cooperative Training) | Jan - Mar 2024

- Summarized the NCA Essential Cybersecurity Controls (ECC) across its main domains (cybersecurity governance, defense, resilience, third-party and cloud, and ICS) and the Traffic Light Protocol (TLP) for information handling.
- Created an informative PDF user guide for FortiToken two-factor authentication (2FA) to help employees secure their accounts.
- Updated the annual security-awareness program using NCA controls (ECC, DCC, CSCC, OSMAC, TCC, CCC, OTCC), scheduling awareness topics such as phishing, password security, and cloud and privacy protection.
- Reviewed and aligned the center's annual security standards with NCA requirements.
- Received a firewall-management overview and supported IAM by creating official employee email accounts.

GRADUATION PROJECT

SmartHoneyNet - Threat Hunting, Detection, and Analysis on Smart Home Networks Using Honeypots, IDS, and ELK Stack | University of Jeddah

- Built a smart home / IoT security platform integrating low-interaction honeypots, a Snort-based IDS, and the ELK Stack (Elasticsearch, Kibana) with SQLite storage for event collection and log correlation.
- Detected and classified six attack categories (brute-force, IoT default credentials, denial-of-service, port scanning, web-exploitation, and command injection), mapping every alert to MITRE ATT&CK.
- Simulated malicious traffic (DoS and brute-force attacks) in a controlled lab and correlated logs to identify default-credential and IoT device weaknesses.
- Achieved 100% precision and recall on a controlled evaluation set with zero false positives on benign traffic, validated by 39 automated tests.

EDUCATION

Executive Master's in Cybersecurity | King Abdulaziz University | Expected May 2027

Bachelor's in Cybersecurity | University of Jeddah | Sep 2020 - May 2024

CERTIFICATIONS

- CompTIA Security+ (SY0-701)
- CEH - Certified Ethical Hacker (EC-Council)
- eJPT - Junior Penetration Tester (INE)
- eCPPT - Professional Penetration Tester (INE)
- eCIR - Incident Response (INE)
- CompTIA CySA+ - Exam Scheduled

ACHIEVEMENTS & LANGUAGES

- Scored 87 in the General Aptitude Test (GAT).
- Arabic (Native) | English (B2+, STEP 84/100, Qiyas).
