Siemens Healthcare Limited – Siemens Healthineers

Healthineers Early Talents Program – IT (Job ID 517127)

Riyadh, Saudi Arabia

Dear Siemens Healthineers Hiring Team,

I am excited to apply for the **Healthineers Early Talents Program – IT** in Riyadh. As a Saudi graduate holding a **Bachelor's degree in Cybersecurity** from the University of Jeddah, with hands-on exposure to IT systems, networking, and security operations, I am eager to begin my career with a global leader that pioneers breakthroughs in healthcare technology.

The program's focus on **IT infrastructure, systems support, networking, cybersecurity, and user access management** aligns closely with my background. During my cooperative training at the National Center for Meteorology, I supported **IAM identity lifecycle and user account provisioning**, contributed to firewall and security monitoring, authored **IT documentation and user guides** that improved MFA adoption, and supported governance and compliance activities. These experiences sharpened my ability to troubleshoot technical issues, support system operations, and deliver clear documentation.

I bring strong **analytical and problem-solving** skills, backed by industry certifications including **CompTIA Security+, CySA+, and CEH**, and a graduation project in which I built an IoT threat-detection platform using honeypots, an IDS, and the ELK Stack. I am proactive, quick to learn new technologies, and thrive in **fast-paced, collaborative environments** where service quality and security matter.

I would welcome the opportunity to grow through Siemens Healthineers' mentorship and development resources while contributing to your IT team. Thank you for considering my application — I look forward to contributing to your mission of pioneering breakthroughs in healthcare, for everyone, everywhere.

Best regards,

Aleen Saleh Aljohani
