PROFESSIONAL SUMMARY

Cybersecurity graduate and Executive Master's student, certified in CompTIA Security+, CySA+, CEH, and INE penetration-testing tracks (eJPT, eCPPT, eCIR). Hands-on training in SIEM monitoring, threat detection, incident analysis, vulnerability assessment, IAM, and NCA ECC compliance. Seeking a role in security operations, threat detection, or GRC.

TECHNICAL SKILLS

Security Operations: SIEM, log analysis, threat detection, incident response, vulnerability assessment, risk assessment, IAM support (account provisioning, MFA/2FA).

IT & Systems: Technical support, troubleshooting, system analysis, Windows administration, user account management.

Networking: Network security, IDS/IPS, Nmap, firewall fundamentals, OT/IoT security fundamentals.

Tools: ELK Stack (Elasticsearch, Logstash, Kibana), Snort, Burp Suite, Metasploit, Kali Linux.

Documentation: Technical documentation, user guides, security report writing.

Microsoft Office: Excel, Word, PowerPoint, Outlook.

Cloud: Cloud security fundamentals.

Operating Systems: Windows, Linux.

CERTIFICATIONS

- CompTIA Security+
- CompTIA CySA+
- CompTIA Security Analytics Professional (CSAP)
- CEH – Certified Ethical Hacker
- eJPT – Junior Penetration Tester
- eCPPT – Professional Penetration Tester
- eCIR – Certified Incident Responder

TRAINING EXPERIENCE

National Center for Meteorology (NCM) | Cybersecurity Intern (Cooperative Training) | Jan – Mar 2024

- Supported firewall management and daily security monitoring for SOC operations.
- Provisioned and de-provisioned employee accounts and supported the IAM identity lifecycle.
- Updated the annual cybersecurity awareness program in line with NCA ECC requirements.
- Authored user guides that improved MFA/2FA (FortiToken) adoption among employees.
- Reviewed the NCA ECC across its 5 core domains and supported policy review and compliance documentation.

GRADUATION PROJECT

SmartHoneyNet – IoT Threat Hunting & Detection Platform | University of Jeddah

- Built an IoT threat-hunting platform combining honeypots, an IDS, and the ELK Stack.
- Detected six attack types and mapped findings to the MITRE ATT&CK framework.
- Achieved 100% precision and recall with zero false positives across 39 automated tests.

EDUCATION

Executive Master's in Cybersecurity (In Progress) | King Abdulaziz University | Expected: May 2027

Bachelor's in Cybersecurity | University of Jeddah | Sep 2020 – May 2024

PROFESSIONAL DEVELOPMENT

IBM Cybersecurity Learning Path: Cybersecurity Fundamentals, Governance/Risk/Compliance & Data Privacy, Vulnerability Management, System & Network Security, Cloud Security, Security Operations & Management, Incident Response & Systems Forensics.

LANGUAGES & ACHIEVEMENTS

- Arabic: Native
- English: B2+ (STEP 84/100 – Qiyas)
- Scored 87 in the General Aptitude Test (GAT).
